

A Brief Explanation of How To Buy Pheromones

Humans only respond to the **pheromones** from other humans. The precise result of **human pheromones** is not known, but studies have proven they are effective. The aftershaves should produce chemical reactions in the body that will **attract others**. There are pheromones for men and women that are meant to attract members of the opposite sex. This is the basic concept of the use in colognes.

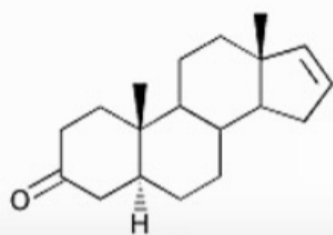

Pheromones were first discovered in 1959 when a group of experts studied the behaviors of insects. According to the study about pheromones, insects excrete this substance to communicate with their own species. Later on, it was found out that other styles of animals including humans do have pheromones which are responsible for some forms of marketing communications especially between parents and their infants as well as in the attraction between sexes.

Human Pheromones Tend to be Something We All Have

They impact our lives even though we are probably not aware of how they do so. Pheromones are known to be strong and important, and it cannot harm to experiment for yourself to see you may notice any distinction.
