

Alter Ego for Men Pheromones: the facts and Review

Alter Ego for men is popular **pheromone cologne** among **pheromone** users. Alter Ego regarding Guys is an oil based pheromone perfume, and has become a real trendsetter in the pheromone industry. It contains (3) of the most robust man pheromones available for **attracting women**. The three pheromones are Androstenone, Androstenol, and also **Androsterone**.

Androstenone -- This pheromone can be found in both men and women, is mostly called a **male pheromone**. Women often perceive men wearing androstenone as stronger as well as manly. The benefit is increased attention from the opposite sex, Studies have also shown that it may cause sexual arousal and the increase in lovemaking tension. However, it can also result in over-aggression along with the other males around you, because it creates a dominant and also intimidating aura.

Androsterone -- Provides the nonthreatening alpha male profile, which are the individual wearing appear to be more masculine and prominent, but without the aggression/intimidation of Androstenone. Hence, androsterone makes all the individual appear to be more masculine and/or dominant, but without the aggression of androstenone. This pheromone also creates an aura of safety, defense and trustworthiness typically associated with a much more peaceful alpha male.

Androstenol -- Androstenol Comes Into Two Types

Alpha isomers and beta isomers. The alpha and beta do not have anything to do with the actual pheromone projecting an alpha aura. Both seem to result in chattiness and friendliness. This can also increase sexual attractiveness as well and it is commonly referred to as an "icebreaker" pheromone. The alpha isomer produces a friendly atmosphere, which are the user a lot more approachable for women. Androstenol also creates an feeling of youth and health, which usually can help to build a youthful perception for the elderly.

Androstenol also produces a great aura of youth and health, that can help to create an impression of reproductive fitness, which usually is attractive. The primary documented reaction to Androstenol or even Androstenol containing products has been an increase in chattiness as well as friendliness from both sexes, yet as mentioned above it can improve sexual attractiveness as well. It has been referred to as a good "ice-breaker" pheromone.

“

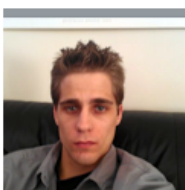

The Pheromone Products Effective Pheromone products such as perfumes have become popular all over the world because of its promise which will enhance an individual s capability in attracting the opposite sex or appear dominant over the same sex.Though extensively accepted in...
