

What Attracts Women To Men

Some guys get all the women. Others get snubbed. Why the difference? What do women really want.

- Take a look at romance novels.
- The hero is always an alpha male.
- Submission guidelines for love novels by publishers spot huge emphasis on the hero.

He Must be Someone People, Presumably a Woman, can Fall in Love With

He or she should be primarily an Alpha male. Meaning, he's the leader of the group. Not just a wannabe or second in order. He carries himself with confidence. Men look up in order to him. Women fall at his feet.

- Appearance-wise, usually, he is lean and muscular together with broad shoulders.
- The type of body a guy gets from the kitchen connoisseur with regular gym workouts.
- He is strong, yet treats his woman with tenderness.

He is Not Afraid to Practice His Woman

Today tread carefully here. There could fine line among what's acceptable as well as what's stalker behaviour. Also, there are similarities between romance story heros and also the serial killers in horror stories. Just what she reads can influence her reaction to your behaviour. Pay attention to the books she reads. If she is into crime stuff, pursuing her relentlessly and showing up at her place of work to court her can cause her to be able to panic, making her believe more stalker than Romeo. If it is romance novels she reads, surprising her with a huge bouquet of roses at her workplace and serenading her at outside her home will probably leave her stary eyed, or at least get her to notice you in a confident light.

What can You Do?

The easiest thing you can do to increase your attractiveness to women is to head for the gym at least thrice a week and work out with the maximum weights you can handle. Build your entire body and the women would notice. From shoulders, in order to arms, to abs, to butt, in order to thighs. Women like men with muscle groups. Go easy on the beer. Apparently, romance books typically have heros with muscled abs and no flab. Think that is too much? What do women do to attract men? Cosmetic surgery, boob work opportunities, starvation diets simply to look attractive to men. At least men don't have to survive on lettuce simply leaves and have balloons inserted into their boxes to attract the opposite sex.

Pheromones Attract Women Physical Appearance Pheromone

- Beyond the physical appearance, a guys character counts.
- The way he treats others.
- A caring man is more appealing than a selfcentered lout.
- Alright, the Rhett Butler sorts appeal to love readers but in real life?

Carry Yourself With Full Confidence

Stand tall. Aspire to be the best you can be in all ways. A positive attitude shows. Keep your cool whenever others inflatable. Your self control provides you with the edge and women notice such things. One of the differences between the alpha whom women gush over and the asshole who turns off the women is not the **physical appearance** but the attitude. A guy who growls all the time and blows up at the slightest provocation and is so full of himself is an asshole. A guy which fights for the rights of those under his protection, which requires responsibility for his or her own actions, who is incredible patient and has great self control is the alpha. The actual sensible girls can tell the difference, but the naive ones usually can't. Still, if you want your own pick of the females, better be an alpha than an asshole.

Sometimes a man may **attract women** for no clear reason at all. The attraction could happen with a chemical degree. Humans like animals secrete **pheromones**. They're sensed in a **subconscious level**. Contrary to popular belief, pheromones tend to be odorless, even though they are now and again mixed into perfumes to the **sex appeal** effect. If you want to go all out to attract women, you can resort to pheromones. Not by refusing to bathe, but by using a pheromone scents.
